

AeroKart Logistics - AP Payment & Working Capital Policy (Internal)

Purpose: Govern FY2025 supplier payment strategy (early-pay / dynamic discounting) while maintaining supplier risk guardrails. This memo is binding for the deliverable.

Clause 1 (External Benchmark Discipline): Cost of capital must be referenced to SOFR from FRED. Required value date: 2025-02-03. Solver must cite the exact FRED table-data URL used.

Footnote A (Trap): The workbook contains a SOFR placeholder rate intended to simulate stale analyst inputs. It is intentionally wrong and must not be used.

Clause 2 (Supplier Risk Guardrail): No early-pay program may be applied to suppliers flagged `Supplier_Risk == 'High'`. Any inclusion must be marked FAIL in compliance and triggers WALK AWAY.

Clause 3 (Concentration Guardrail): Within the eligible early-pay pool (L1+L2 scopes), the top supplier share within the top-2 suppliers must be $\leq 65\%$.

Clause 4 (One-Time Costs): Platform implementation cost must be shown as one-time only and must not be netted into run-rate savings.

Clause 5 (Decision Standard): Output must state a single recommendation: ACCEPT or WALK AWAY. Hedged language is non-compliant.
