

## NovaShip Logistics - Carrier RFP Policy Memo (Internal)

**Purpose:** Guardrails for selecting a primary TL carrier for FY2025 on NovaShip's two-DC network (NJ1, TX2).

**Clause 1 (Decision Outcome):** Output must rank the three finalist carriers 1–3 and provide a single recommended award (primary + backup).

**Clause 2 (Service Floor):** Any finalist must maintain  $\geq 92.0\%$  on-time on the audited baseline lanes; otherwise apply a risk penalty per Clause 5.

**Clause 3 (Concentration Cap):** Primary award may not exceed 70% of total FY2025 TL linehaul dollars with a single carrier unless a backup carrier is explicitly defined.

**Clause 4 (Fuel Index Discipline):** Fuel schedules must be normalized using the EIA weekly U.S. No.2 Diesel retail price (week specified in the prompt).

**Clause 5 (Risk Penalties):** If a carrier fails Clause 2, add a fixed \$180,000 risk penalty to its evaluated FY2025 TCO. If it fails concentration-cap design (no backup carrier), add \$120,000 penalty.

**Footnote A (Accessorial Guardrail):** Detention + liftgate charges are the primary variance drivers; proposals with capped accessorials should be favoured.

**Data integrity note:** Rows tagged Notes=='Pilot' are pilots/one-offs; exclude from FY2024 baseline and all carrier evaluation math.
