

AeroKart RetailOps - Corrugated Supply Proposal (FY2025) (Supplier Pack)

Supplier proposes FY2025 base price reset and quarterly escalation tied to a corrugated PPI benchmark.

Key term: Escalation factor for Q1 FY2025 is defined as $(\text{PPI Dec 2025} / \text{PPI Dec 2024})$.

TRAP: Appendix shows a 'PPI Dec 2025 = 999.999' placeholder used for formatting only; it is not the real benchmark.

Proposed blended unit price for FY2025 (all-in): 0.4590 USD/unit.

Operational note: Pilot lines in the spend extract must be excluded from baseline and savings analysis.

Decision Archetype: Walk-away threshold - accept contract only if delivered price $\leq$ benchmarkbased walk-away ceiling.
