

SkyRoute Logistics - FY2025 Transportation Sourcing Guardrails (Internal)

Purpose: Provide procurement and service guardrails for FY2025 transportation cost reset. This memo is binding for the deliverable.

Clause 1 (Index Discipline): FY2025 inflation normalization must use the BLS Producer Price Index by Industry for General Freight Trucking, Long-Distance Truckload (FRED series PCU484121484121). Required month: Dec 2025. Cite the exact FRED table-data URL.

Clause 2 (Service Guardrail): Overall on-time performance (excluding Pilot and Noise) must be $\geq 94.5\%$. If not met, recommendation must be DO NOT APPROVE regardless of savings.

Clause 3 (Carrier Concentration): On Top-3 lanes by FY2024 spend, no single carrier may exceed 70% of volume after levers (dual-source minimum).

Clause 4 (Exception Handling): PHX1→LAX lane is Operationally Critical only when Mode == 'TL'. In that case, concentration cap may increase to 80% but evidence must cite Clause 4.

Footnote A (Trap): Workbook contains a placeholder PPI value for Dec 2025. It is intentionally wrong and must not be used.

Footnote B (Noise): Rows marked 'Noise: test invoice' must be excluded from baseline and lever computations.
