

Situation Overview

Item	Value
Demand per Week	9,600
Avg Shipments	8,320
Weekly Gap	1,280
Dispatch Misses in Last 6 Weeks	3
OEM Escalation Status	Active

Customer Service Risk

Risk Item	Value
Annualized Penalty Exposure	Rs 8.5 Cr
Premium Freight Q2 YTD	Rs 0.94 Cr
Potential Business-at-Risk	1 major model refresh
Response Deadline	72 hours

Dispatch Misses by Week

Week	Shipment Gap vs Demand
W14	-1,220
W15	-1,360
W16	-1,450
W17	-1,290
W18	-1,420
W19	-1,250

Expedite Freight Cost

Week	Expedite Cost Rs lakh
W14	8.5
W15	14.0
W16	19.5
W17	11.8
W18	22.2
W19	17.9

OEM Escalation Summary

OEM	Issue	Severity	Latest Note
OEM A	Dispatch misses	High	Recover within 4 weeks
OEM B	Schedule instability	Medium	Weekly monitoring call
OEM A	Premium freight burden	High	Shared-cost discussion active

Proposed CNC Cell Business Case

Metric	Value
Capex	Rs 12.0 Cr
Added CNC Capacity	4,800/week
Expected Shipment Recovery	1,600/week
Payback	22 months
IRR	19%
Approval Needed By	This week

Assumes downstream conversion unchanged

Expected Throughput Uplift

Step	Weekly Units
Current Shipments	8,320
Incremental CNC Output	1,600
Forecast Shipments	9,920

Capacity Gap View

Process	Reported Constraint Rank
CNC Machining	1
Final Grind	2
Heat Treat	3
Inspection	4
Deburr/Wash	5

Working Hypothesis

Hypothesis	Status
Machining is the pacing resource	Assumed true
Downstream capacity sufficient if CNC output rises	Assumed true
Queue before CNC confirms bottleneck	Assumed true
Customer risk recoverable through CNC capex	Proposed

Appendix: FY25 Plant Investments

Project	Capex Rs Cr	Status
Compressor Upgrade	1.8	Complete
Solar Rooftop	3.2	In progress
Tool Crib Digitization	0.6	Complete
New Forklifts	0.9	Complete

Appendix: Non-Bracket Programs

Program	Weekly Sales	Margin %	Comment
Hub Carrier	12,000	18%	Stable
Spacer Ring	44,000	11%	Commodity
Pedal Arm	9,500	22%	Growing
Retainer Clip	61,000	7%	High volume
