

Section 1: Delhi NCR Market Overview

Quick commerce penetration in Delhi NCR reached 34% of urban grocery spend in Q3 FY25, driven by Blinkit's aggressive dark store expansion (112 stores as of Sep 2025).

Average orders/day per dark store: 820

Average picks/hour: 39.2

Average dispatch capacity: 36.0 orders/hour

Key challenge: Last-mile congestion in South Delhi during peak hours (6–9 PM) reducing effective delivery slots by 18%.

Top performing stores by throughput:

Lajpat Nagar: 44.1 orders/hour

Hauz Khas: 42.8 orders/hour

Dwarka Sector 10: 38.4 orders/hour

Noida Sector 18: 41.2 orders/hour

Gurugram DLF Phase 2: 43.0 orders/hour

Section 2: Mumbai Market Overview

Mumbai dark stores operate across three micro-market tiers:

Tier A (South Mumbai, Bandra, Juhu): Avg 52 orders/hour throughput

Tier B (Andheri, Borivali, Thane): Avg 44 orders/hour throughput

Tier C (Navi Mumbai, Mira Road): Avg 36 orders/hour throughput

Zepto's Bandra store leads city benchmarks at 58 orders/hour peak throughput.

Key operational driver: Automated conveyor picking system deployed in 6 stores.

Average packing capacity utilization: 78%

Average dispatch bay utilization: 91% (highest constraint in Mumbai stores)

Mumbai SKU mix: Fresh produce = 28% of orders, FMCG = 54%, Personal care = 18%

Section 3: Hyderabad Market Overview

Hyderabad q-commerce market growing at 31% YoY (FY25).

Total active dark stores in Hyderabad: 47 (as of Dec 2025)

Average store throughput: 33.8 orders/hour

Top performer: Jubilee Hills store at 41.0 orders/hour

Key bottleneck: Cold chain packing for fresh produce adds 2.1 min/order impacting overall packing stage throughput.

Regulatory note: GHMC inspection compliance adds avg 0.8 days/month of downtime across Hyderabad stores.

Section 4: SKU Assortment Analysis

Average SKUs per dark store (national benchmark): 2,800–3,200

ZipDash HSR Layout current SKU count: 3,050

Recommended SKU range for 10-min SLA compliance: 2,500–3,500

Top 20 SKUs by order frequency (national):

1. Amul Butter 500g
2. Tata Salt 1kg
3. Aashirvaad Atta 5kg
4. Parle-G Biscuits 800g
5. Fortune Sunflower Oil 1L

Dead stock SKUs (>30 days no movement): avg 4.2% of total SKU base

Recommended clearance threshold: >21 days no movement

Section 5: Rider Fleet & Last Mile Benchmarks

National benchmark: 1 rider per 8 orders/hour dark store capacity

ZipDash current ratio: 1 rider per 7.2 orders/hour (above benchmark)

Average rider idle time during off-peak: 34%

Average deliveries per rider per hour (peak): 2.1

Recommended surge pricing trigger: >85% rider utilization

Rider churn rate (industry): 6.8%/month

ZipDash rider churn (FY25): 5.2%/month (below industry benchmark)

Section 6: HSR Layout - Installed Stage Capacity Specifications

The following figures represent the maximum designed throughput capacity for each fulfillment stage at the HSR Layout dark store as of commissioning (Jan 2025).

Stage	Installed Capacity (orders/hour) Utilization at 38 orders/hr	
Picking	48.0	79.2%
Packing	41.0	92.7%
Dispatch	36.0	105.6% ← OVER CAPACITY

Note: Dispatch stage capacity is defined by number of active dispatch bays (4 bays).
Each bay processes a maximum of 9.0 orders/hour under standard conditions.
Current dispatch stage is operating above designed capacity during peak hours.
