

AquaFizz – Distribution Costing Policy

Section 1: Cost per Case

Cost per Case = Freight Cost / Cases Transported

Section 2: Freight Cost Coverage

Freight cost includes:

- Fuel
 - Driver wages
 - Toll charges
-

Exclusions:

- Return journey cost (empty km)
 - Idle time cost
 - Underutilization inefficiency
-

Section 3: Utilization Reporting

- Load factor reported as:
Monthly fleet average
 - Route-level variation not tracked
-

Section 4: Route Planning Assumptions

- Each route treated independently
 - No backhaul optimization required
 - Return trips assumed unavoidable
-

Section 5 (Small Font Clause – Critical)

“Return empty kilometers are not allocated to outbound delivery cost calculations and are excluded from cost-per-case reporting.”
