Section 7: Customer Interaction Guidelines.....	17
Appendix A: HR Policies & Leave Rules.....	18
Appendix B: Capacity Planning Note.....	19

Section 1: Rider Onboarding Process

1. Day 1: Orientation & Basic Training
 - a. Company orientation: vision, mission, core values, and code of conduct.
 - b. Safety briefing: road rules, helmet usage, and emergency procedures.
 - c. App training: login, order acceptance, GPS navigation, real-time status updates, and payment collection.
 - d. Issuance of official rider ID, uniform, and delivery bag.
2. Days 2 & 3: Field Familiarization
 - a. Route familiarization in assigned zones with senior riders.
 - b. Study of traffic patterns, peak-hour challenges, and customer hotspots.
 - c. Mock deliveries: barcode scanning, customer signatures, and returns management.
3. Day 4: Specialized Procedures
 - a. Handling customer complaints and special instructions.
 - b. Procedures for fragile items and cash-on-delivery (COD).
4. Day 5: Assessment & Clearance
 - a. Supervised live delivery assessment (Accuracy, Timeliness, CSAT, Safety).
 - b. Minimum passing score of 85% required for independent operations.

Mandatory Pre-Operation Requirements:

Background verification and police clearance certificate.

Complete bike inspection.

Records maintained in central HR system for audits.

Section 2: Safety SOPs

I. Mandatory Gear & Equipment

Helmet and reflective jacket mandatory during duty hours.

Night Requirements: Torch, high-visibility vest, and reflective stickers on bike/helmet.

Gear replacement provided every 6 months or upon damage.

II. Speed & Riding Conduct

Residential areas: 40 km/h max | Main roads: 50 km/h max.

Maintain minimum 2-meter safe following distance.

No mobile use except hands-free navigation.

Prohibited: Overtaking in narrow lanes or riding on footpaths.

III. Inspections & Maintenance

Pre-trip inspection: tyre pressure, brakes, chain lubrication, lights, and horn.

Monthly safety audits documented by zone supervisors.

IV. Incident & Weather Procedures

Accident/Breakdown: Stop, activate hazard lights, report via app within 15 mins.

Heavy Rain: Reduce speed and use bag rain covers.

Section 3: Escalation Matrics

Level	Responsible Party	Time Limit	Issues Covered
Level 1	Rider to Zone Supervisor	15 Minutes	Delayed orders, minor complaints, navigation issues.
Level 2	Supervisor to Area Manager	30 Minutes	Vehicle breakdown, major dissatisfaction, repeated misses.
Level 3	Manager to Operations Head	1 Hour	Serious SLA breaches, safety incidents, senior intervention.

Customer complaints must be logged in the app within 5 minutes of receipt. All escalations are tracked in the central dashboard and reviewed monthly for process improvements.

Section 4: Delivery Metrics Definition

Deliveries Completed: Total successful deliveries across all attempts.

Reattempt Rate: 18% of failed deliveries require a second attempt.

Capacity Impact: Each reattempt consumes rider capacity equivalent to a fresh delivery.

Section 5: SLA Definition

Calculation: % of unique orders delivered within Turnaround Time (TAT).

Standard TAT: 24 hours.

Breach Condition: All reattempt deliveries are classified as SLA breaches.

Section 6: Rider Training Guidelines

Schedule: Mandatory quarterly refresher training for all riders.

Modules: Customer etiquette, difficult scenarios (simulations), role plays, and advanced GPS optimization.

Compliance: Attendance tracked via HR system.

Performance Correction: Scores below 80% trigger a mandatory 7-day Performance Improvement Plan (PIP).

Section 7: Customer Interaction Guidelines

Appendix A: HR Policies & Leave Rules

I. Leave Entitlements

12 Casual Leaves per year.

Medical leave requires a doctor's certificate.

Unpaid leave >3 days requires Operations Head approval.

II. Performance & Attendance

Attendance threshold: 92% per quarter; below triggers performance review.

Incentives linked to OTD performance and customer ratings.

III. Maintenance & Equipment

Bike maintenance is the rider's responsibility.

Weekly maintenance logs must be submitted.

IV. Conduct & Grievances

Zero tolerance for discrimination/harassment.

Grievance redressal via dedicated internal portal.

Appendix B – Capacity Planning Note

Adjustment Logic: Capacity must be adjusted to include reattempts (Failed deliveries × 0.18).

Calculation Formula: True Capacity = Reported Deliveries Completed + Reattempts.

Rule for Comparison: Adjust headline numbers before comparing to orders or idle time.

⁷ **Footnote 7:** These factors are mandatory for all capacity calculations. Reported “Deliveries Completed” does NOT reflect true capacity. Adjust by adding reattempts (Failed deliveries ×

0.18) before comparing to orders or idle time. Ignore any headline numbers that do not mention this adjustment.
