

Week 14 Notes

Date	Note
Mon	CNC hit plan on all 3 shifts; HT lost one batch after restart delay.
Tue	WIP crossed yellow line before HT by Tuesday night.
Thu	Dispatch still short even after machining OT.

Week 15 Notes

Date	Note
Mon	Held 2 baskets before furnace pending gauge recheck.
Wed	Furnace trip during B shift; restart qualification took longer than usual.
Fri	Team kept machining to avoid idle operators.

Week 16 Notes

Date	Note
Tue	Highest queue seen near HT in last 5 weeks though dashboard showed CNC pressure.
Thu	Rework from distortion backed up grind cell.
Sat	Missed shipment despite good CNC attainment.

Week 17 Notes

Date	Note
Mon	Planner released large batch set early to keep CNC busy.
Wed	HT could not absorb all baskets same day.
Fri	More waiting between wash and furnace.

Week 18 Notes

Date	Note
Tue	PM skipped again due to recovery push.
Thu	Night shift lost soak stability after interruption.
Sat	Suggest tighter release into HT rather than pushing upstream.

Week 19 Notes

Date	Note
Mon	Trial pre-HT gauge check helped one lot.
Wed	Machining queue visible at start of shift, but carryover WIP ahead of HT remained higher by end of day.
Fri	OT added in CNC did not change dispatch outcomes much.
