

MetroCargo Terminal Expansion and Improvement Options

Option Summary

Option	Capex	Lead Time	Operational Relevance to current issue
New conveyor loop	1800000	4 months	Low
Add 1 screening lane	450000	3 weeks	High
Expand dock staging area	600000	2 months	Medium
Add racking in storage zone	300000	6 weeks	Low

Operational note

1. Current issue appears concentrated in evening bank, not full-day storage.
2. Space utilization is elevated but not binding for premium dispatch SLA.
3. If screening queue exceeds 45 minutes after 18:30, downstream build-up and dock interventions do not materially recover same-day premium uplift because shipments miss dispatch synchronization for the 20:00 premium bank.
